

NRHARC Club Meeting
10/27/2008 7:00 pm
NRH Fire Administration Building, NRH

24 total present.

Bob Norris called the meeting to order. Minutes were read and seconded.

Harry said that 3 completed the class for Technician license. We are taking pictures of members for the club roster. John Davis needs volunteers to serve on a committee to plan educational activities for club meetings.

Ron Boyk has the repeater and controller functioning. He will move the 20W PA from the other repeater.

We will plan for the January club meeting at a local restaurant. We will sponsor \$500 scholarship for a high school student. November 11 will be Hazmat training.

At a future meeting we could construct 2m ground plane antennas. Would the club be interested in sponsoring the JOTA radio activity for scouts in October?

Hugh and Roger gave an interesting presentation on rescue operations by Texas Task Force One after Gustav and Ike. For hams to assist with communications, there needs to be pre-planning and coordination of effort.

Shirts and hats with personalized information are available on the club web site. Had 50-50 drawing and motion to adjourn.

Minutes recorded by John Dossey K5GD.
